COURSE DESCRIPTION

This symposium is designed to bring state of the art information on current research and clinical management in the field of gastrointestinal cancers. A distinguished and internationally renowned faculty panel will share their expertise and foster discussion of the most recent breakthroughs and relevant research findings in GI cancers. The goal of the course is to provide information on clinical innovations and novel therapies to clinicians involved in the care of patients with GI cancers. Attendees will be exposed to new concepts, develop a broad understanding in management protocols, and receive updates on recent advances in therapy.

COURSE OBJECTIVES

- Discuss updates on cutting-edge scientific research, state-of-the-art treatment, and challenges in the treatment of gastrointestinal cancers
- Illustrate evidence-based research that affects the practice of clinical gastrointestinal oncology
- Describe current surgical, medical, and radiation oncology techniques in both early stage and advanced disease/cancers

INTENDED AUDIENCE

This conference is designed for physicians and allied health professionals who manage patients with GI cancers.
